

Renal Services

The Renal Medicine service offers comprehensive kidney care, including screening tests to help individuals detect kidney problems early.

Our specially-trained clinical coordinators, nurses, educators, counsellors, psychologists, pharmacists, dietitians, medical social workers and doctors manage diseases affecting the kidneys, as well as specific conditions associated with immunological, familial, urological, medications and various cancer-related problems. Patients with kidney disease often have diabetes and high blood pressure as well.

We ensure our patient's seamless transition to hemodialysis, peritoneal dialysis, kidney transplant (as appropriate) or maximum conservative (without dialysis) care and provide ongoing management.

What happens during a visit?

A doctor will assess your condition and recommend suitable treatment(s) to you.

Common conditions we see:

- Chronic Kidney Disease
- Inflammatory conditions that may involve swollen legs, blood, protein (sometimes foamy) or stone in the urine, usually with abnormalities in blood and urine tests
- Kidney diseases relating to diabetes, hypertension, recurrent urinary tract infections, enlarged prostate or kidney stones
- Kidney diseases relating to other acute illnesses

Inpatient services

- Diagnostic evaluation, therapeutic intervention/s with ongoing/shared care to manage renal diseases that affect both the kidneys
- Intermittent haemodialysis in Acute Kidney Injury, kidney failure, etc
- Nephrology consultations
- Peritoneal Dialysis
- Renal Replacement Therapy in the Intensive Care Unit

Outpatient services

- High Dependency Hemodialysis
- Management of the entire spectrum of kidney diseases
- Multi-disciplinary care of Chronic Kidney Disease and kidney transplant recipients
- Maximum Conservative Care for kidney failure (as appropriate)
- Patients with difficult control of hypertension with or without the need for further interventions
- Peritoneal Dialysis

We also perform these procedures:

- Hemodialysis and Peritoneal Dialysis catheter insertions
- Kidney Biopsy
- Ultrasonography of kidneys
